

Publicaciones: Biomatemáticas.

- Optimal control for a bone metastasis with radiotherapy model using a linear objective functional A Camacho, E Díaz-Ocampo, S Jerez Mathematical Modelling of Natural Phenomena 17, 32, 2022.
- Antigen receptor therapy in bone metastasis via optimal control for different human life stages S Jerez, E Pliego, FJ Solis, AK Miller Journal of Mathematical Biology 83 (4), 1-27, 2021.
- Nonlinear modeling and control strategies for bone diseases based on $TGF\beta$ and Wnt factors A Camacho, S Jerez Communications in Nonlinear Science and Numerical Simulation 100, 105842, 2021.
- Strange attractors in discrete slow power-law models of bone remodeling S Jerez, E Pliego, FJ Solis Chaos: An Interdisciplinary Journal of Nonlinear Science 31 (3), 033109, 2021.
- Theoretical and numerical study of a skeletal muscle regeneration model with inflammatory response JI Ruiz-Bolaños, HV Kojouharov, FJ Solis International Journal of Computer Mathematics, 1-17, 2024.
- A nonlinear transport–diffusion model for the interactions between immune system cells and HPV-infected cells FJ Solis, LM Gonzalez Nonlinear Dynamics 111 (16), 15557-15571, 2023.
- A computational method for the covariance matrix associated with extracellular diffusivity on disordered models of cylindrical brain axons D Cervantes, MA Moreles, J Peña, A Ramirez-Manzanares Mathematical Biosciences and Engineering 18 (5), 4961-4970, 2021.
- Disentangling the role of virus infectiousness and awareness-based human behavior during the early phase of the COVID-19 pandemic in the European Union MA Capistrán, JA Infante, ÁM Ramos, JM Rey Applied Mathematical Modelling 122, 187-199, 2023.
- Stochastic dynamics between the immune system and cancer cells with allee effect and immunotherapy E hernández-lópez, M núñez-lópez, MA capistrán Journal of Biological Systems 31 (03), 1125-1146, 2023.
- A Model of Dengue Transmission MA Capistran, IB Bribiesca, GE Salcedo Handbook of Visual, Experimental and Computational Mathematics: Bridges, 2023.
- Additive multiple contacts and saturation phenomena in epidemiological models are not detected by R_0 JG Villavicencio-Pulido, I Barradas, C Nila-Luévano Mathematical

- The Sooner Strict Public Health Strategies are Applied the Lower the Peak of the Epidemic: the SARS-CoV-2 Case JG Villavicencio-Pulido, I Barradas, F Saldaña, C Nila Luevano Trends in Computational and Applied Mathematics 24 (3), 575-594, 2023
- Beyond R0: Exploring New Approaches. A González Galeano, I Barradas, JG Villavicencio Pulido Universidad Tecnológica Metropolitana, 2023
- Modelo matemático para la interacción competitiva entre células cancerosas y sistema inmune con terapia de cáncer JA Mesa-Zora, RJ Camargo-Amado, I Barradas Ingeniería y competitividad 24 (2), 2022
- Panic behavior induces multiple endemic states and backward bifurcation D Benítez, I Barradas Mathematical Methods in the Applied Sciences 45 (5), 2831-2851, 2022
- Mathematical model for the competitive interaction between cancer cells and the immune system with cancer therapy JA Mesa-Zora, RJ Camargo-Amado, I Barradas Ingeniería y competitividad 24 (2), 2022.
